Flush Panels

Are an interlocking panel system with a smooth soffit or wall surface or optional reveal and are ideal for applications where a flush or flat appearance is desired. A concealed fastening system improves the flush appearance while providing additional strength. Can be installed vertically or horizontally. Typical applications for this panel are walls, soffits, fascia or equipment screens. Optional stiffeners are available to ensure flat, level planes. Also available with venting options. Custom and standard trims available to complete your system.

Soffit Panels

Our pre-formed profiles are effective solutions in soffit projects and can be ventilated for increased air flow capacity and are suitable for both commercial and residential soffit use. Available in all colors and different profiles
Standard & custom trims available to complete your system.
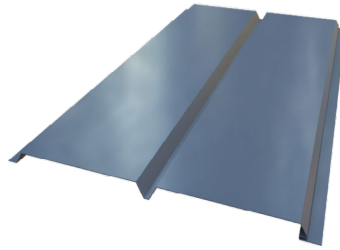

Wall Panels

Metal wall panels take the visual appearance of traditional wall cladding to a new level by offering a unique look that is both cost-efficient and eco-friendly. With various substrate materials available, RMS is your go-to metal wall panel Supplier and fabricator. We can help you create a unique, visually-appealing look for your next building project. Available in multiple profiles, colors, and sizes. Standard and custom trims available
